Declaration of Conformity
Packaging and Packaging Waste Regulation
(EU) 2025/40

The undersigned confirms that the packaging and packaging waste supplied complies, where applicable, with the relevant regulatory requirements outlined below.

In accordance with the Packaging and Packaging Waste Regulation (PPWR), the total concentration of lead, cadmium, mercury and hexavalent chromium contained in our packaging or packaging components does not exceed 100 mg/kg.

Where relevant to the intended application of the product, we also comply with other applicable restrictions concerning hazardous substances, including Regulation (EC) No 1907/2006 (REACH).

Multibrackets has implemented processes intended to maintain ongoing compliance with the applicable requirements of Regulation (EU) 2025/40. Supporting evidence may include material declarations, technical specifications, test reports and other relevant documentation.

Upon request, we will provide the information and supporting documentation necessary to assist both your compliance obligations and our own under applicable law. This includes, where relevant, information required for the preparation of technical documentation and the performance of conformity assessments.

Certain additional PPWR requirements, including provisions relating to recyclability, minimum recycled-content percentages and labelling, will become mandatory at a later date. Some of these requirements are still subject to further clarification and implementation through additional legislation.

We continuously monitor relevant regulatory developments and will provide timely information regarding any further measures that may be required to meet future legal obligations.

This declaration applies to packaging supplied by the undersigned and remains valid until replaced by a revised declaration, or until changes in legislation, packaging design, materials or manufacturing processes affect compliance.
