AT

Multibrackets we know you are not always sitting in the same position whilst at work, so why should your screen stay in the same place? Our series Gas Lift Arm 's is the ultimate desk or wall mount companion to add flexibility and ingenious ergonomics to your LCD monitor. Designed to provide outstanding performance, with a sleek and streamlined outlook, it frees up space and allows to easily position your display for greater productivity. It is ideal for office and home use, especially in situations where several people use the same display or where a user can be both standing up and sitting down. So let your fingertips lift, swing, tilt and rotate your LCD display.

M VESA GAS LIFT ARM BASIC

A triple jointed gas suspended monitor arm, designed by Multibrackets to optimize your productivity and help reducing strain on neck, back and eyes.

The M VESA Gas Lift Arm is made out of a durable aluminum construction and uses a gas driven suspension technique. This makes the screen “float” whilst allowing movement with near zero effort. Sleek and streamlined, the M VESA Gas Lift Arm Single frees up space and allows positioning of your display for greater productivity. Fingertip tilt provides smooth adjustment in any direction. Easily move the screen from landscape to portrait position or move the screen close to the desk, high up, matching almost any desired working position imaginable.

Supports VESA standards 75x75 and 100x100 and holds screens weighing from minimum 2kg and

up to maximum 10kg.

Our M VESA Gaslift Arms utilize real gas lift cylinders. This German invented technology is used for a wide variety of industries and applications.

The gas cylinders make your screen float and moved around by your hand or even fingertip.

The snap on head gives a fast assembly and disassembly of the LCD perfect for any IT department who wants to minimize downtime.

The M VESA Gas Lift Arm Single holds to your standard workdesk (max 50mm), or assemble it using a workdesk thru hole technique.

Available in Silver, Black and White.

M VESA GAS LIFT ARM DESK OR WALL SINGLE

A double jointed gas suspended monitor arm, designed by Multibrackets to optimize your productivity and help reducing strain on neck, back and eyes.

The M VESA Gas Lift Arm is made out of a durable aluminum construction and uses a gas driven suspension technique. This makes the screen “float” and it can then be moved with near zero effort. Sleek and streamlined, the M VESA Gas Lift Arm frees up space and allows positioning of your display for greater productivity. Fingertip tilt provides smooth adjustment in any direction. Easy move the screen from landscape to portrait position or move the screen close to the desk, high up, matching almost any wanted working position imaginable.

Supports VESA standards 75x75 and 100x100 and holds screens weighing from minimum 2kg and up to maximum 10kg. This interval is important to keep due to the gas driven piston that keeps your screen floating in the air.

Our M VESA Gaslift Arms utilize real gas lift cylinders. This German invented technology is used for a wide variety of industries and applications.

The gas cylinders allow your screen float and move around with a hand or just a fingertip. The snap on head gives a fast removal or attachment of your Monitor. Perfect for any IT department wishing to minimize downtime.

The M VESA Gas Lift Arm Basic attaches to your a standard workdesk (max 50mm), or workdesk through hole technique.

Available in Silver, Black and White.
