**WARRANTY CARD**

MULTIBRACKETS.COM

MULTIBRACKETS™ Limited Warranty

Multibrackets warrants its products to be free of defects in material and workmanship for the product's Warranty Period. The Warranty Period commences on the original purchase date of the product.

All Multibrackets products are covered by a limited product warranty:

- FIVE (5) years for metal video monitor mounts; all racks and non-electrical rack accessories
- TWO (2) years for gaslifts and sit-stand workstations
- ONE (1) year for all motorized and/or automated products, plastic speaker mounts; all speaker stands; all furniture; all wood (MDF) accessories

For warranty claims made during the Warranty Period, MULTI BRACKETS will replace any defective product part free of charge. Should a part on your Multibrackets product fail, please create an RMA case on www.multibrackets.com/support to make a warranty claim. We will await your documentation and then discuss the problem with you and once we confirm the product is under warranty, we will ship replacement parts to you. This Limited Warranty does not cover the costs of removing and replacing defective parts from your Multibrackets product. So, if your problem requires a repair technician, you must pay any labor charges.

This Limited Warranty extends only to the original purchaser of the product and is automatically void if your Multibrackets product is modified in any way, improperly installed, taxed beyond its stated weight capacity or otherwise misused or abused. All Multibrackets products are intended for indoor use only and any

outdoor use voids this Limited Warranty. The Limited Warranty for wall and ceiling mounts is void if the mount is moved from its initial installation. To the maximum extent permitted by applicable law, Multibrackets disclaims any other warranties, express or implied, including warranties of fitness for a particular purpose and warranties of merchantability. Multibrackets will not be liable for any damages whatsoever arising out of the use or inability to use its products, even if Multibrackets has been advised of the possibility of such damages. To the maximum extent permitted by applicable law, Multibrackets disclaims any responsibility for incidental or consequential damages.

Product installation

1. Always consult a professional installer when installing this item.
2. Make sure there is space for the display in the area where the screen is moved up into ceiling position. Inspect the area and that there is no obstruction by pipes or other objects stopping the screen from moving into position.
3. The ceiling opening size is generally required to be minimum equal to or greater than the size of the TV.
4. It is recommended to reserve an inspection port in the ceiling for easy maintenance.
5. **IMPORTANT:** During installation, there should be no people standing under the ceiling mount.

Buttons

Code matching mode for ceiling mount & remote control

1. First press the memory button on the panel, the indicator light starts to flash.
2. Release the memory button (1), press the settings button (2) on the back of the remote control and hold it down. The light indicator stops flashing. This indicates that the code has been successfully written and the remote control can be used. If not, repeat the above steps and try a few more times.

How to set upper and lower ideal position

Set the upper position

We recommend to set the upper position first, then the lower position. You can always restart the position setup process by unplugging the power and follow the steps below again.

Set the lower position

Note: The lower position setting is set without beep/alarm initiation.

RS 232 OVERVIEW

RS232 control (machine interface is DB9 female)

Serial port setting: baud rate 2400. Data bits: 8 Parity bits: N Stop bit 1.

The machine is connected to ② pin (signal receiving). ⑤ pin (signal ground wire)

Up: FF 10 11 00 DD (send several times to ensure the machine receives the code)

Stop: FF 10 11 00 CC (send several times to ensure the machine receives the code)

Drop: FF 10 11 00 EE (send several times to ensure the machine receives the code)

FF 10 11 ** AA Set the id address, **you can use x01 - 0xFF parameters as the ID address.

FF 10 11 00 BB clear ID address

(Note: 00 is the default ID address. The address code can learn any code within 01-FF. After learning, you can control the machine through the learned address code. You need to send a learning command in the code learning state to complete the setting. The buzzer will beep twice when the machine receives the command)

If the screen is positioned on the lower part of the mount:

The weight of the screen is not balanced. The electrical engine will not have enough power to lift the screen since its "center of gravity" is too low, producing the same effect as if a forklift would lift materials using its front tip of the fork, making it tip over to the front.

If the screen is positioned in the middle of the mount:

The weight of the screen is balanced.
