

Cable extension wiring guide

M Motorized Public Floorstand Dual Pillar 180 HD
EAN: 7350105213120

Important:

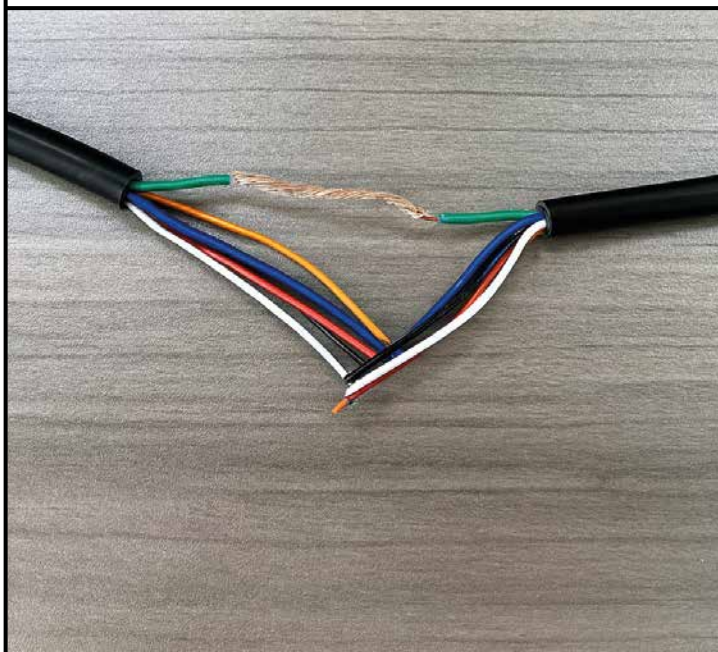

Must be installed by a licensed electrician. Use professional electrical tools only.

- 1. Remove outer insulation**
Carefully cut and remove the outer cable sheath.

- 2. Expose inner wires**
Peel off the black insulation. Inside, you'll find 6 color coded wires.

- 3. Strip and connect wires**
Strip about 1-2 cm of insulation from each colored wire. Match wires by color and twist them together.

- 4. Insulate connections**
 1. Wrap each twisted pair with electrical tape.
 2. Repeat for all 6 wires.
 3. Wrap the entire bundle securely with tape for protection.

Final Notes:

- Double check connections before use.
- Ensure no bare wire is exposed.
- Secure the cable to prevent strain on the connections.
